September 2003 - May 2007

Member the Alpha Lambda Delta National Honor Society and the National Science Foundation/Machine Learning. Learned about Artificial Intelligence and predictive web browsers.

PROJECTS

Driscolls.com — *Driscoll's brand website relaunch*

Architected the new website. Oversaw the implementation of Sitecore and creation of the elements to make them reusable and modular. Built the API for sorting and searching elements in the site. Additionally built out the existing tagging mechanisms in Sitecore to better meet our clients needs.

VIOC.com — *Valvoline's brand website relaunch*

Determined the proper way to build the website based on custom creative. Built the Sitecore modules, video integration, and API data collection. Creating custom function to store data as Sitecore items: coupons, videos, store location, and reviews.

Suzuki.com — *Suzuki's brands websites maintenance / customization*

Maintenance of Suzuki's web presence: suzuki hub, marine site, cycles site, media site, and an ad planner. Creation of custom microsites. Setting up new hosting infrastructure and architecting the relaunch of a modern Sitecore implementation.
